Description

Our Performance Gloves are designed for active racing sailors, and boast a number of features ideal for high energy on-deck activity. A Clarino™ PU fabric palm provides high levels of grip and durability, giving you the peace of mind you need while out on the ocean. Heavily reinforced fingers help to defend against rope burn and are articulated and pre curved to ensure full dexterity and freedom of movement. The back of the hand is elasticated, allowing for even greater freedom of movement, while an easy pull-on, velcro-secured wrist tab makes taking the gloves on and off far easier. Tough and versatile enough to go with you every time you set foot on deck.

Composition: 30% Polyamide, 30% Polyester, 40% Polyurethane
