Description

Primer GTX is the low cut shoe dedicated to the world of mountain/fast hiking: fast hiking with light packs off road. The shoe adopts solutions that are part of La Sportiva's mountain DNA combining them to technology and features deriving from the world of mountain running, approach and mountaineering.

The particular breathable Nano-Cells™ structure of the uppers works in synergy with the innovative and exclusive GORE-TEX® SURROUND™ technology that guarantees unequalled levels of breathability and includes all the uppers and for the first time the midsole too for 360° breathability. The STB Control System™ construction method deriving from Mountain Running wraps the midsole in the medial part with the function of providing torsion resistance to a snug fitting, stable and comfortable shoe. Primer belongs to the mountain hiking line of La Sportiva, a concentration of technology and solutions that condense the alpine DNA of the company in products dedicated to lightweight hiking thanks to the unique combination of elements deriving from mountain running (50%), approach (30%) and Mountaineering (20%).

Features:
