Description

DesignWool is a new, high quality underwear collection from Aclima. DesignWool is knitted using a technique called Jaguard knit. The Marius pattern was designed by Unn Søliland in 1953. The pattern was named after slalom skier, war hero and actor Marius Eriksen.

DesignWool is knitted with itch free, fine merino wool, weighing 230 g per square meter. We use a knitting technique called Jaguard-knit, which provides infinite possibilities.
