Description

Every sensor, Every device for Everyone, Everywhere

A high performance sailing processor tailor made for you. Model E4 redefines the way you interact with your boat data. With Model E4 you don't just buy a processor; you buy an experience that keeps getting better over time.

Screen | View

Use every device as a display and turn any smart device or computer into a Sailmon display, fully configurable just like our high performance marine displays.

Use any marine display - Not just Sailmon's..

Simply replace your existing processor, keep your old displays or add new displays from any manufacturer.

Future proof

Connect any existing sensors or add new sensors, Model E4 makes them work together and increases the lifespan of your system.

Nav | Desk - Instrument control: it's not rocket science

Available for iOS, Android or PC devices, the NAV | desk provides intuitive functionality to enable anyone to operate, control, calibrate and update their system and to maximize the performance and features.

Crew | View

Love your sailing, before, during and after...It brings all Sailmon moments in one place to view share and enjoy. On and off the boat.
