Description

The Facnor/Sparcraft removable bowsprits for asymmetric Spinnakers or Gennaker and Code 0 can be fitted on sailing boats from 25 to 57 feet. The deck fixing device allows a free foredeck when arriving at the harbour or mooring.

Features:

Neat design:

- End fitted with an integrated machine sheave, user friendly
- Bridle attachment integrated in the front end fitting
- The central fixing collar is captive from the bowsprit but is removable from the fixing block. The foredeck is therefore totally free (no more fixed collar in the way)
- Rotating collar captive from the section: removable bowsprit for storage alongside one boat edge

Simple and efficient functioning:

- Easy fixation thanks to an automatic locking device on deck fixing blocks
- Simple installation (only a short backwards movement is needed to fit the bowsprit on deck)
- Quick removal and storage on a third fixing block

Furling System Accessories: Facnor/Sparcraft Alloy Bowsprit

- The locking system incorporates an anti-theft device
- Integrated line stopper for holding the tackline

Complete kit including:

- Aluminium bowsprit with special end fittings: bridle attachment at the front and fixing block device at the back (delivered pre-installed)
- Adjustable Central fixing collar
- Deck fitting blocks and two counter plates

Technical data:

Alloy section ø mm	Boat length ft	max. Sail Area m ²	
		assymetrical Spinnaker	Gennaker & Code 0
70	25 - 36	60	37
