Description

The FastFind CREW1 is an AIS Man Overboard Device with a range of features designed to accelerate detection and support localised rescue for vessel crew in an MOB situation.

Key Features:

- Highly accurate, regularly updated GPS coordinates to accelerate location detection
- Water and manual activation options
- Compatible with AIS electronics, e.g. chart plotters
- High strength LED signals SOS message to aid low light detection
- High powered battery allows extended signal operation with 36 hrs activation time (typical for -10C)
- 5 years storage life
- IP68 Waterproof with 5m immersion depth.
