Description

Antibacterial biocide with broad spectrum of activity against bacteria, yeast and mold. The cleaner and corrosion protection care for and protect the fuel system.

For the long-term preservation while in storage of marine engines or engines with a low diesel flow rate.

Features:

- highly effective
- decontaminates infested tank systems
- active in preventing bacterial infestation

Can Size: 500 ml

Intended use:

For preventive use and for de-infesting contaminated tank systems on vessels and in storage tanks.

Use a 1:200 booster dose for systems which are already contaminated. One measuring cup (25 ml) is sufficient for 5 l of diesel fuel.

As a preventive 1:1000 application, one fill of the dosage chamber (25 ml) is sufficient for 25 l of diesel

Use biocide safely. Always read the label and product information before use.
