Description

With its integrated lithium battery and outstanding efficiency, our Travel is a great alternative to any small petrol outboard. It can do everything a 3 HP outboard motor can, but is lighter, cleaner, quieter, and more convenient.

Moreover, it easily propels tenders, dinghies and day-sailers up to 1.5 tons and, when required, even over long distances.

The top-of-the range model Travel 1103 C comes with direct drive, a high-capacity 915 Wh battery and a range-extending 73% increase in capacity compared to the base model.

Greater power and durability, yet quieter than ever. The Travel 1103 C runs at just 33 DB – as loud as a whisper – and is the quietest motor in its class.

Features:

- As powerful as a 2 or 3 hp petrol outboard motor
- Long-life, high-performance lithium battery pack

- Integrated on-board computer with real-time GPS and display of remaining range, speed, charge level and many other functions
- Light weight
- USB port for on-board lamp or for charging cell phone or digital camera
- Easy handling: tool-free installation, start at the push of a button, battery change in seconds
- Waterproof according to IP67
- Extra strong exchangeable battery
- 2 years warranty

Speed and Range*

Travel 603 with integrated floating 500 Wh-Battery (29,6 V / 18 Ah):

For tenders, dinghies and daysailers up to 1 ton

	Speed kn (km/h)	Range nm (km)	Running Time hh:mm
