Description

The Sirius XTS has been specifically developed for the commonly used Spinlock® XTS clutch and aims to improve the holding power without locking earlier than desired. Also suitable as a sheet for very aggressive winches. Moreover, the hybrid fiber core ensures lower stretch compared to conventional core/cover constructions.

Therefore, this line featuring the right price/performance ratio is the ideal partner for each demanding cruising sailor.

Specifications:

- Core: Dyneema®, XLF
- Cover: Polyester, Technora®, UHMWPE
- Field of use: crossover
