## Description

The IPX6 waterproof 12 / 24V QI certified waterproof wireless charging range enables charging for the outdoor environment, without the need for phone charging cables.

Designed from the ground up, this is the world's first waterproof wireless charge system created specifically for the use on board, with the unique technology housed in an IPX6, fully encapsulated and sealed unit.

Working directly with 12 / 24 V systems, ROKK Wireless is ideal for life on the move and is perfect for sail and power boats and also RV. Easy install, anywhere you need your phone - indoors or out. No more wires! Exceeding the latest and highest standards of the QI wireless protocol.

ROKK Wireless is independently certified to deliver ultra-safe charging anywhere on board.
