Description

This propeller has the same output power than the classic 240mm or the 280mm propeller but with an improved shape against seaweed. The building method is also different : the 3 blades are fixed to a hub and can be thus changed independently

Scope of delivery :

- 1 plastic hub
- 3 blades in high-grade composite
- 1 fixation screw M5x20
- 3 grub screws for the blades adjustment
- 1 extraction screw M6x40

The 240mm diameter is recommended for a speed range between 6 and 11 knots

The 280mm diameter is recommended for a speed range between 2 and 9 knots
