Description

When Plastimo invented the double reading compass, it was a major innovation which allowed the yachtsman to follow his course from the cockpit and the cabin.

The Contest 101 goes a step further : its exclusive mounting possibilities on any bulkhead -whatever the thickness and its aesthetics allow the

Contest 101 to adapt perfectly to today's yachts, both in terms of engineering technique and glamorous design.

Features:

- Double reading : from cockpit and cabin
- 5 years warranty
- Every compass card is balanced manually to ensure its perfect horizontality. This is an extremely delicate operation, requiring patient and scrupulous craftsmanship which only years of experience can bring
- The model for inclined bulkhead is designed for a bulkhead tilted by 10 to 25° from vertical.
- The card remains fully efficient, even with a very high angle of pitch.
- Compass card : double graduation : horizontal and vertical, graduated every 5°, heading numerals every 30°.
- Mounting : comes as standard in a bulkhead version (vertical or 10-25° inclined bulkhead). Can be mast-mounted with the addition of optional mast-mounting kit.
- Lubber lines : 3 lubber lines, at 45°.
- Heelmeter : graduated every 10°.
- Lighting : 12-24 V LED
- Supplied with protection cover, drilling template.
