Description

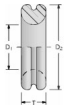

Low friction rings are at the heart of Soft links. Simple, lightweight and resistant Rings, together with more sophisticated products, such as Solid rings and Hooks, revolutionized the way we design fixed and running rigging on sailboats, and not only on sailboats.
Thanks to the perfect polishing Soft links give extremely low friction. Thanks to their simplicity they cut prices down and require absolutely no maintenance. The universal solution. The first of Soft links' characteristics is versatility. I can use a Ring as barber, or lazy jack. On the backstay bridle instead of a sheave or for 8:1 control systems. For reefing or 3D genoa adjusting. And obviously, as a block.

Material: Aluminium, hard anodized for minimum friction

Modell	D1	D2	T	Gewicht	SWL

Blocks: Antal Solid Ring

	mm	mm	mm	gr	kg
R22.44	22	44	14	37	1000
