Description

The Segelwelt.at sail trainings are for many sailors the start into the new sailing season and the first test after a long winter break.

Mainly in Izola we train on **J/24** (keelboat with spinnaker), **Seascope 18** (planing keelboat with gennaker) and **FarEast28R** (One Design

keelboat with gennaker) boats.

Target groups: ambitious cruising sailors of all levels. Racing sailors beginners and advanced.

After a sailing day (optional) to become familiar with the boat we spend three intense training days on the water. The training days start with a briefing, followed by training sessions of about two to three hours.

We finish the day with a theory unit including photo and video analysis. Special topics will be discussed in working groups.

We recommend every participant to schedule with the optional sailing day to become familiar with the boat, specially after a long sailing break.
